Yes - I've been using the reed switch/magnet for awhile now, and received mixed results. Magnet would not trigger the reed switch often. In my case once the magnet triggered the signal, the other end of the block would trigger the signal back to clear. If the reed switch missed the trigger, the block would not clear. I found the ultrasonic sensor more reliable in my situation.

Format advantages. At the time the LP was introduced, nearly all phonograph records for home use were made of an abrasive (and therefore noisy) shellac compound, employed a much larger groove, and played at approximately 78 revolutions per minute (rpm), limiting the playing time of a 12-inch diameter record to less than five minutes per side. The new product was a 12- or 10-inch (30 or 25 cm ...
