Understanding Accounting Methods - dummies
Financial Accounting vs. "Other" Accounting. Financial accounting represents just one sector in the field of business accounting. Another sector, managerial accounting, is so named because it provides financial information to a company's management. This information is generally internal (not distributed outside of the company) and is primarily used by management to make decisions.

CHAPTER 3 UNDERSTANDING FINANCIAL STATEMENTS

Cash-basis accounting. In cash-basis accounting, companies record expenses in financial accounts when the cash is actually laid out, and they book revenue when they actually hold the cash in their hot little hands or, more likely, in a bank account. For example, if a painter completed a project on December 30, 2003, but doesn't get paid for it until the owner inspects it on January 10, 2004 ...

Without the information provided by financial accounting, investors would have less understanding about the historical, current, and prospective financial health of stock and bond issuers.

Understanding accounting and financial information ...

The purpose of accounting principles is to establish the framework for how financial accounting is recorded and reported on financial statements. When every company follows the same framework and rules, investors, creditors, and other financial statement users will have an easier time understanding the reports and making decisions based on them.

Financial Accounting | Explanation | AccountingCoach

This chapter will introduce you to the subject of accounting and financial information so you can begin to get an understanding for how the valuation process works. The Role of Accounting Accounting is often called "the language of business" because it communicates so much of the information that owners, managers, and investors need to evaluate a company's financial performance.

Accounting - Wikipedia

Accounting, after all, is said to be the "language of business". How could that be the case, you ask? Well, that is because accounting aids members of the organization (internal) and even the external parties, understand what exactly is going on with the business. In short, it is a means of communicating information about the business.
