In this unit we explore markets, which is any interaction between buyers and sellers. We start by deriving the demand curve and describe the characteristics of demand. Next, we describe the characteristics of supply. Finally, we explore what happens when demand and supply interact, and what happens when market conditions change.

Elasticity | Microeconomics | Economics | Khan Academy
Economics (/ ? k ? ? n ? m ? k s, i ? k ?-/) is the social science that studies how people interact with value; in particular, the production, distribution, and consumption of goods and services.. Economics focuses on the behaviour and interactions of economic agents and how economies work. Microeconomics analyzes basic elements in the economy, including individual agents and markets ...

Economics - Wikipedia
Productivity describes various measures of the efficiency of production.Often, a productivity measure is expressed as the ratio of an aggregate output to a single input or an aggregate input used in a production process, i.e. output per unit of input, typically over a specific period of time. The most common example is the (aggregate) labour productivity measure, e.g., such as GDP per worker.
