Mathematical Methods for Physics and Engineering - 3rd Edition
Publisher Summary. This chapter discusses the instrumentation and sampling methods of infrared and Raman spectroscopy. The chapter highlights that Raman scattering and IR absorption are significantly different techniques and require very different instrumentation to measure their spectra.

In physics, a phonon is a collective excitation in a periodic, elastic arrangement of atoms or molecules in condensed matter, specifically in solids and some liquids. Often designated a quasiparticle, it represents an excited state in the quantum mechanical quantization of the modes of vibrations of elastic structures of interacting particles..
