Vitalism and the scientific image in post-enlightenment ...

Vitalism, school of scientific thought—the germ of which dates from Aristotle—that attempts (in opposition to mechanism and organicism) to explain the nature of life as resulting from a vital force peculiar to living organisms and different from all other forces found outside living things. This force is held to control form and development and to direct the activities of the organism.

Vitalism in contemporary chiropractic: a help or a hinderance?

Scientific realism is the view that the universe described by science is real regardless of how it may be interpreted. [clarification needed]Within philosophy of science, this view is often an answer to the question "how is the success of science to be explained?"The discussion on the success of science in this context centers primarily on the status of unobservable entities apparently talked ...

Buy Vitalism and the Scientific Image in Post ...

Vitalism is the belief that "living organisms are fundamentally different from non-living entities because they contain some non-physical element or are governed by different principles than are inanimate things". Where vitalism explicitly invokes a vital principle, that element is often referred to as the "vital spark", "energy" or "élan vital", which some equate with the soul.
