Wikibooks is a useful resource if you're curious about a subject, but you couldn't reference it in academic work. It's also worth noting that although Wikibooks' editors are sharp-eyed, some less scrupulous contributors may plagiarize copyright-protected work by other authors. Some recipes, for example, appear to be paraphrased from well-known chefs.

Vivitar 283 Flash Flashes user reviews : 4.1 out of 5 - 40 ...
Vivitar introduced the 283 in 1972. By 1976, they had already produced their 3,000,000th unit. It's actually a ceremonial flash, made of gold, and it sits in the office of Jim Wellington, who is a Big Cheese at the company. Jim has been with Vivitar since portable flash was a small pile of magnesium powder.

Vivitar 283 Flash Review - Ken Rockwell

Vivitar 283 Guide Number | Photo.net Photography Forums
In the old days a totally manual flash had a fixed output. Every flash had a guide number in metres or feet, the 283's is 36 in metres at ISO 100. You had to calculate the distance to the subject then divide the the distance in metres by the guide number and the answer would give you the aperture to use.

VIVITAR 283 OWNER'S MANUAL Pdf Download.
The Vivitar 283 is just too good a bargain to pass up. You can get one on Ebay for about \$30 and it has a guide number of 120 ft at ISO 100. The problem is if you want to bounce it off an umbrella, at manual power it takes 10 seconds to recharge and it does not have variable power.

Vivitar 283 Guide Number
In 2012, I measure the actual light output of my Vivitar 283 as Guide Number 45 in feet at ISO 100, which is one stop less than its rated GN 64. This is typical for all flashes, and not bad for a 1970s flash tested in 2012. While rated for a 7-second recycle time, I measure only 4 seconds to ready-light on with Sanyo AA Eneloop.

Vivitar 283 Guide Number - CTSNet
Vivitar 283 reviews - Flashes (Third-party - Legacy) . Guide number of 36 4 auto modes and a manual mode Illuminated dial for aperture guidance

vivitar 283 | B&H Photo Video
In this environment, the 283's ASA 100 Guide Number of 120 is adequate to bounce the light off the Ceiling. In my opinion, this gives a much more natural and richer look to the image than the usual direct-flash, where the flash aims straight at the subject with all the flattering lighting quality of a headlight.

Why does Vivitar 283 and 285 Lie about their Guide Numbers ...

Can I use my Vivitar 283 flash with any DSLR cameras ...
Vivitar was a big player in the market a long time ago. The Vivitar 283, 285, and 285HV have been trusty photographer's assistants for a long long long time, most especially in the days before flashes had all sorts of automated features. Since it's heyday, Vivitar has gone out of business and been picked up more than once.

Vivitar Flashes Quick Guide - Help Wiki
The original Vivitar 283/285 flashes (made way back in the 1980s) used a high voltage trigger. Wasn't a problem on the largely mechanical sync mechanisms in cameras then, will likely destroy a modern digital camera. The HV series (283HV and 285HV) used a low voltage trigger and are completely compatible with any modern camera.
