Vue.js and TypeScript: A complete tutorial with examples ...

vue-touch. Touch events plugin for Vue.js. This plugin does not support Vue 2.0 yet. This is a directive wrapper for Hammer.js 2.0. Install. This branch is only compatible with Vue 1.0. For the Vue 2.0 compatible rewrite, see the next branch. CommonJS. Available through npm as vue-touch.

GitHub - vuejs/vue-touch: Hammer.js wrapper for Vue.js

Let ' s think about it. – The App component is a container with Router.It gets app state from Vuex store/auth.Then the navbar now can display based on the state. App component also passes state to its child components. – Login & Register components have form for submission data (with support of vee-validate).We call Vuex store dispatch() function to make login/register actions.
