He told me that either the head gasket is blown (most likely) or there is a crack in the block. I haven't checked it out just yet. My plan for it is to get it running, then to get the rabbit looking new again.

Ade, I've never swapped a Mk1 engine but I used to have a Mk1 with a standard Mk2 16v (1.8 KR) engine and it flew. I recently installed an Audi 6A 2L 16v in my Mk2 and that transformed the car with the extra torque more than anything, in a lighter Mk1 it would be awesome. I'd say go for a 2L 16v, tried and tested and relatively cheap to do.
