The headlight and dimmer switches on the GTI Mk4 are not a typical high fail system on the car, but the nice thing is when they do fail you can change them both out in well under an hour. Figure 1 Headlight Switch - Begin with the switch in the off position

Golf 92 wiring diagrams (eng) - SlideShare

Check the emergency lights to test the wiring, lights and sockets. If the flashers work, then test for a blown fuse. If your Volkswagen uses the same lights for the turn signals and the brake lights, you may have a bad turn signal switch that is causing the lower brake lights to stop working. A bad turn signal switch will not affect the third ...

grey/white is only there on 90spec poverty spec models, it pops to the front of the relay socket to power the fog light switch. proper GTI dont need it, instead they got a relay in the socket to power the switch. pre-90 the fog light switch is powered from the fusebox either way, just uses a different pin depending on if it has front fogs or not

Wiring - vw-resource.com

The problem was the ignition switch. When I took everything apart I noticed that the wire and connector was melted. I replaced the ignition switch, melted wire, and connector. I have the old part and the receipt. My only concern is that my car could have caught fire. See all problems of the 2002 Volkswagen GTI .
