### Installing Your In-Wall or In-Ceiling Speakers

In the case of speaker wires you'll normally see choices of 12-gauge, 14-gauge, 16-gauge and 18-gauge, with the smaller numbers thicker than the larger numbers. That means 12-gauge (12AWG) speaker wire is much thicker than 18-gauge (AWG) wire, so if you're looking for the thickest wire you'd want 12AWG. (Yes, 10AWG would be even thicker, but then you start running into other problems with capacitance and signal quality which we're not going to get into here.)

### In-wall Wiring Guide for Home A/V

If you're going to run speaker wire inside your walls or ceiling, you'll need UL-rated speaker wire labeled CL2 or CL3.
