KEMEL EAGLE INDUSTRY CO.,LTD.

I've searched previous posts but without success so, can anyone explain how a water lubricated shaft seal works? When I bought my boat last year I 'burped' the seal as described by the vendor. This year when she went back in the water I did the same thing but could not get any water out around the rubber boot. I'd like to understand how these things work and would be glad if someone could ...

Maintenance is very easy thanks to the facetype design. Because of their simple construction, the EVK series seals have been adopted for many small ships and coastal ships.

Simplan Shaft Seals - Simplex Americas

Swelling and distortion can be an issue with traditional bushing materials. This is not the case with Vesconite due to its virtually zero water absorption rate and dimensional stability. Unlike bronze or rubber bushings, fresh and saltwater serves as an effective lubricant for Vesconite. This makes it an ideal material for pump bowl bushings ...

Oil lubricated sterntube bearing, sterntube seals ...

Lip seals are no longer approved for API pumps, but are still used in some ANSI pumps. For pumping environmentally unfriendly fluids, mechanical seals are used. Lubrication selection guidelines Most pumps are lubricated with rust and oxidation inhibited oils (R&O) that also have small amounts of antifoam and demulsifier additives.
