The 4A-FE engine is the dependable, lightweight and compact DOHC engine that is currently carried in the Corolla All-Trac/4WD station wagons ('89 model AE95 series). Although the basic construction and operation are identical to the engine used in the '89 model AE95 series, the crankshaft pulley, intake manifold, throttle body, engine mount,

Toyota A engine - Wikipedia

The Toyota E engine family is a straight-four piston engine series, and uses timing belts rather than chains. The E engines were the first multi-valve engines from Toyota designed with economy, practicality and everyday use in mind. Like many other Toyota engines from the era, the E engine series features a cast iron block, along with an aluminium cylinder head. E engines are lighter compared to earlier Toyota engines, due the hollow crankshaft, thinned casting of the cylinder block, and several

How to replace coolant temperature sensor Toyota Corolla. Defect code P0128 Years 1991 to 2007

How to Test an O2 Sensor by Contributor . On a gasoline engine, an oxygen sensor is used to ensure that the proper air fuel ratio is reaching the engine. Some automobile manufacturers recommend that oxygen sensors should be replaced once every 100,000 miles whether they are working or not. However, this can be very expensive, especially since ...

What Are 4efe Engine Sensors

Diagnosis Codes for the 4EFTE/4EFE engine. 4EFET = 4efte(turbo) 4EFE = 4efe(non turbo) cut out = disconnected wires(usually check sensor plug) short circuit = exposed wires(the positive and the negative) are touching each other - Anything within { } ? is my added interpretation. - Oh and the term ?goes off ? means the check engine light code will turn on in the dashboard.

How to Test an O2 Sensor | It Still Runs

hmmm, that map sensor could be from a soarer. BTW the one i have is similar to his one: Also, after reading in supra forums, it seems that the map sensor from a supra is 2 bar too, so that should explain why i haven't had any issues with it. Forgot to mention, i have an engine from an ep82, 2 grip ecu.

Toyota Starlet - Coolant temperature sensor and ...

Engine detonation happens during the internal combustion process if the gasoline in the cylinder explodes and then changes the ignition timing. This detonation is sometimes referred to as engine knocking. When a vehicle's engine is started up and detonation occurs, there is a knock sensor that will detect these vibrations and send a voltage signal ...
