Guide to Ramp Starts | X-Plane Developer

The X-Plane 11 Flight Management System The Laminar Research / X-Plane 11 FMS resembles a system built by Collins and found in regional airliners, and is similar in operation to the one used in Boeing aircraft, including the 737 (illustrated in this manual). Rival systems are built by Honeywell and Thales for use in Boeing and Airbus aircraft.

X-Plane 10 manual

In X-Plane, move your mouse to the top of the screen (causing the menu to appear) and click About. In the About menu, click About X-Plane. In the window that appears, there will be an Update X-Plane button if an update is available. Clicking this will cause X-Plane to download the latest update and run the updater for you.

Airplane Parameterized Light Guide | X-Plane Developer

X-Plane by default includes liveries for only a small number of major airlines, but these will always work. See the category lib/airport/aircraft/airliners/ for available liveries on ramp starts marked as Operation Type='Airline'.

X-Plane 11 Desktop Manual | X-Plane

X-Plane provides two versions of the cockpit/panel brightness levels in two sets of datarefs. The _manual datarefs simulate a light that stays the same brightness under all conditions. Such a light will typically be either too dim during the day or annoyingly bright at night if the user does not manually adjust it.
