Yamaha Tg55

The TG55 is basically a 16-bit sample playback based synth module – perhaps the first one from Yamaha employing this kind of sound generation, other than the old classic FM at DXs and TX modules - which appeared also in the same era like, e.g. the Roland U-220. This synthesis method used in the TG55 is called AWM2.

Yamaha TG55 Tone Generator | Vintage Synth Explorer

The TG55 is a good old honest sample-playback synthesizer module. I find its sounds to be pretty nice considering its age, and although its architecture is quite fiddly to get around (there are many, too many buttons to push and screens to access to edit the sounds), it is a good investment and would be a nice addition to anybody's setup.

Yamaha TG55 - Synth Mania

The TG55 is basically a 16-bit sample playback based synth module – perhaps the first one from Yamaha employing this kind of sound generation, other than the old classic FM at DXs and TX modules - which appeared also in the same era like, e.g. the Roland U-220. This synthesis method used in the TG55 is called AWM2.

Yamaha TG55 Tone Generator synth module New internal ...

YAMAHA TG55. The maximum polyphony is 16 voices. The factory sounds are those quite typical early nineties, but don't judge it by only the presets. The TG55's successor, the TG500 had a much larger sample ROM and polyphony two years later.
