1996 Yamaha TRX 850 specifications and pictures
yamaha trx850 specification Based on the TDM 850 engine, it was developed with feedback from the crankshaft workpiece palladaca racer and adopted a 270 degree crank which brings out the same unequal interval explosion as 90 degrees V twin.It realized pulse-like ride and excellent traction.

YAMAHA TRX850(4NX) EngineStart 2
Just like the Duc, the TRX850 had a 2 cylinder engine in a tube frame, a sporty riding position and a bikini fairing. The most exciting about the TRX was its engine. It was based on the Yamaha TDM850 and had 5 valves per cylinder (3 in and 2 out) but the TRX was the first production motorcycle with a 270° crank (or 90° if you prefer) with the so called "crossplane" technology.

Yamaha Parts & Accessories - Parts Lookup

The TRX IMHO is a very underrated bike. Like the Deuce meister says they're a nimble machine with good punchy if not overtly powerfull engine. A well ridden SV650 is more than a match but that's not the point. 80hp would be just nice for rapid traversing of mountain passes without the rate of tyrewear you get with a 600 of 1000 IL4.

Yamaha TRX 850

The Yamaha TDM is an 849 cc DOHC parallel-twin motorcycle that heralded the modern "Sport touring" category. The TDM was first manufactured by the Yamaha Motor Company of Japan in 1991. The TDM has a pressed-steel frame and a dry sump engine with five valves per cylinder, (three inlet and two exhaust).

Yamaha TRX 850 Technical Specifications - Ultimate Specs

The TRX was designed to compete in the market with the Ducati 900SS V-twin, whose tubular trellis frame it mimicked. [3] Although developed cheaply from Yamaha's "parts bin", using a modified TDM850 engine and FZR cycle parts, the TRX performs well and has "a coherent identity of its own". In ...
