Hi all, still have problem and still displayin no codes, been on another snap on machine and hela one now..am awaiting a guy who re programs ecu's etc to have a look, he has recommended lookin at the starter motor, maybe pullin to much power ie away from ignition and fuel injectors as we found how ever hot it is if u stick a jump pack on battery she starts!!!...anyone have any ideas on this ...

Vauxhall 1.7TD Z17DTH Engine

One of our Astra 1.7cdti pool cars is playing up, and has been for a few months now. After a while it appears that the turbo packs in and the car won't go over 50-60mph on the motorway, and has little or no power if you slow below that and need to speed up.

Isuzu / General Motors 1.7 Z17DTH engine - AutoManiac

Engine speed sounds about right for cranking, if a little on the low side. Does it sound as though it is cranking over slowly? As you say, the actual rail pressure is a lot lower than the desired quantity. I don't think a leaking injector would cause such a drop in pressure, plus it would show itself quite obviously when the engine did actually ...

[Astra Mk5/H] [04-09] diffrence between Z17DTL and Z17DTH

2017-03-23 - Popular engines: ISUZU 1.7 4EE2 - Whenever we think of ISUZU, which we never do, it's usually a tiny bus, ridiculously high for its length and width, that we have in mind, most likely provided by a travel agency as a part of a low interest optional trip to some God-forgotten village. What we should have in mind though...

Click on the buttons below to read more about the typical problems that fall outside the scope of routine maintenance.

6 Common Power Steering Problems Explained | DoItYourself.com

The engine runs normally with normal power, if it wasn't for that sound doing the leakage test I don't think I could tell that it has a problem. On the road there is a small noise at around 2000 rpm, close to the noise it does prior to detonating, when punching hard on the engine, but it disappears at higher rpm. What do you think it could be?
