Prerequisites | Magento 2 Developer Documentation

Version 1.0 of the Zend Engine functions much like the heart and brain of PHP 4.0. It contains the process that provides the sub-structure and facilities to the functional modules. It also implements the language syntax, as well. The Zend Engine 1.0 is actually the second revision of the PHP scripting engine. It is still based on the

Home - Zend Framework

Explain the architecture of Zend engine with the diagram. Zend Engine is used internally by PHP as a compiler and runtime engine. PHP Scripts are loaded into memory and compiled into Zend opcodes. These opcodes are executed and the HTML generated is sent to the client. The same is depicted below What is zend
